THE SWISS REPUBLIC. On several accounts Switzerland is deserving of especial attention at the present moment. Excepting the little community of San Marino in Italy, it is the oldest republie or confederation of free states in Christendom. The acquisition of Savoy by France has brought the latter in dangerous proximity to those mountain fastnesses, which form stock. the key to nearly all Southern Europe; nor is the feeling between the two states of the most agreeable character. Petty disputes have for some time been breaking out between them, and these are usually made to assume a magnitude out of all proportions to their real importance. But the Swiss have had their internal dissensions, which have been settled only on fields of bloody combat. It is to these, with the agencies which created them and the consequences to which they gave rise, that we would more particularly

direct attention. It is nearly five centuries and a half since the renowned William Tell struck the blow which ended in the independence of his country. But the heroes who won Margarten did not possess much more than a thousand square miles of territory, torming the Forest Cantons, or Schwytz, Uri and Unterwalden. These formed the nucleus of the present republic, occupying the almost inaccessable regions North of the Mount St. Gothard, in whose sides are found the sources of the Rhine, the Rhone and the Ticino. The region was an eagle's nest, provided by nature for the hatching of a race of men strong of limb, bold in action, and full of enthusiasm -just the qualities necessary to win success in such an age as that. Victory brought them allies, and during the ensuing forty years the confederation was joined by Luzerne, Zurich, Glaris and Berne. The little state was repeatedly called to struggle with invaders-Austrians, Burgundians, French, Sardinians, Milanese, and even English; but at Sempach, Basle, Grandson, Morat, Nancy, &c., its sons vindicated its rights and made it one of the most formidable powers in Europe. New cantons were admitted; and at the close of a severe struggle with the Emperor Maximillian, in 1499, the treaty of Basle acknowledged the unconditional independence of the Swiss Confederacy. Fourteen years subsequently the last of the old "Thirteen cantons were admitted.

It was not, however, a career of glory and conquest without any drawbacks. In a controversy with the house of Savoy the republic was driven out of possessious above the Lago Maggiore, on the Italian side of the Alps, and these have ever since remained with Piedmont. Then the monarchs of Europe made treaties for liberty to obtain recruits among the hardy mountaineers; and these men accustomed to the license of the camp, soon corrupted the morals of a state, which they dishonored as much by their license as their fathers had honored by their valor. Religious disputes formed another element of discord. The inhabitants of the cities and the lower districts adopted the doctrine of the Reformation; those of the Forest Cantons, including the nucleus of the republie, adhered to Rome. Disputes came to blows; and in one of the engagements the brave Zwingle lost his life. The quarrel was renewed and in time became thoroughly "sectional" in character-the Protestant North arrayed against the Roman Catholic South. So long and bitter was the strife that it is believed that Austria might have intervened and re-conquered the country; but the jealousy of other powers prevented her from acquiring a position of so much importance, from which she might act against all the neighboring states with safety to herself. In 1648, at the great European Congress, the independence of Switzerland was formly recognized, France and Germany, with the smaller states being unwilling to surrender that key of Southern Europe to any other

power. We pass by the disputes arising from inequality of taxation, at the beginning of last century, and the war of "liberation" undertaken by the French at its close. For a time the country became in effect a French province. But Moscow and Waterloo restored independence to those mountains; and the treaty of 1814 saw the limits of Switzerland further enlarged, until they included twentytwo cantons (the present number). It was not, however, until 1830 that a liberal constitution was framed, and even that was destined to give way to the present, adopted in 1848. This was at the close of another religious controversy, arising from a determination of the Diet to expel the Jesuits. Seven of the upper cantons formed a league known as the Sonderbund, determined to resist the decree of the National Council. Once more the two factions came to blows, and in 1847 the Sonderbund troops were defeated at Friburg and Luzerne, the consequence of which was the expulsion of the Jesuits, and the formation of the present constitution .--Excepting the executive, which consists of a committee of seven, chosen for three years by the other councils, the general government bears a pretty close resemblance to that of this country, and doubtless the result of our experiment had much to do in modeling the fundamental law of that veteran republic.

Summing up, we would observe that Switzerland has had the bitterest kind of interpal disputes-downright irrepressible con- ties, all of whom we will dispose of on the best flicts of her own--based, too, upon religious | terms. feelings, which are the strongest, perhaps, in the human breast. Yet she has survived them all, partly owing to her commanding situation: partly to the growing toleration of the age, which acknowledges the right of mankind to think differently from one another. The country never was in a more healthy condition at home, or respected abroad, than at the present moment.-N. Y. Comm.

The Empress of Austria sailed from Plymouth in Queen Victoria's private steam yachton the 23d of November, on her way to Madeira. At Antwerp, where she first embarked, she was attended by the King of the Belgians. She is described on that occasion as "a woman of noble bearing, with rich black bair, black eyes, features strongly marked and highly distinguished. She wore a black velvet hat, with jet ornaments; a very fine black veil over her face, a black dress; a velvet cloak of the same color, with | Worsted, Hosiery, Gloves, Shawls, Cloaks, and all rich turs.'
